

Worst UI/UX Challenge

Theme: Worst Login Experience

Overview

Design a login flow that is intentionally confusing, illogical, and guaranteed to make users regret their life choices. Good luck ruining things on purpose!

Examples of What You Can Include

Note: you can choose any one of these OR get creative!

1. Cursed Screen Ideas

You need **at least 3 screens**, but the content is up to you. Some ideas:

- A login page where fields make zero sense
- A CAPTCHA that destroys hope
- A pointless verification or loading screen

2. Absurd Password Rules

If you want the login to feel impossible, try things like:

- Password must include emojis
- Must start with punctuation
- Must avoid every letter in your own name
- Must spell a word backward

3. Chaotic CAPTCHA Concepts

Fun ways to ruin someone's day:

- "Select all images that represent disappointment"

- CAPTCHA that refreshes if you breathe wrong
- Fast-moving images that dodge your cursor

4. Misleading Inputs & Buttons

Classic sabotage tricks:

- A “password” field that’s actually asking for your favorite vegetable
- Identical buttons that do opposite things
- Required checkboxes that look disabled

5. Terrible UI Choices

If it looks painful, you're doing it right:

- Clashing, blinding colors
- Overlapping fields
- Tiny unreadable text
- Buttons half off-screen

Submission

- Submit your entry via the [Submission Form](#) that will be shared with you in the WhatsApp Group
- **Inside the Form, you must enter:**
 - Your Team Name
 - EITHER an interactive Figma prototype link (ensure access is set to "Anyone with the link can view") OR a deployed project link.
 - A short explanation of why your login flow is awful and deserves to win.
- **Deadline:** 1:00 PM on Day 2 (19 May).
- *Note: Deployment is optional but you will receive **bonus points** for it!*

Judging Criteria

- Creativity: make the judges laugh in disbelief!
- How intentionally bad the UX is
- How well confusion and frustration are designed
- A clear flow (even if everything else is terrible)

Don't forget to have fun!
